Subject 1 : Convolution

1. Project Overview

The objective is to design and implement a tool that intuitively teaches the convolution concept without relying on explicit linear algebra notation.

2. User Niche Definition

The tool must be designed specifically for a target non-technical audience segment. Each team must choose a unique and valid combination of the following three parameters: :

1. Age Group : 10-14 / 15-18 / 19-25 / 26-50 / 51+
2. Job: mechanic, artisan, farmer, etc.
3. Education level : middle school / primary school / no education

3. Deliverables

Each student group must submit:

1. Project Report.
2. Oral Presentation & Live Demonstration.
